Solidarity with the workers from Greece

Defending the jobs in the Greek Ministry of Finance

The World Federation of Trade Unions – TUI – Public Services and Similar expresses all its solidarity with the 595 workers in struggle to maintain their jobs in the Ministry of Finance of Greece. This struggle is also the struggle of all the workers of the public services in the European Union against the policies of the capitalist governments, whose primary aim is to destroy the Public Administration in order to accomplish its privatization.

Defending public services is defending the people's right to health services, to the social services, education, justice, the rule of law and many others that represent the right to live with dignity. At the same time, this struggle is also the struggle of the workers from Europe for their employments, their wages and their rights.

In all European countries, neoliberal policies have chosen the public services workers as a special target to attack, but their answer has also been strong and will continue on being, until the defeat of the governments which impose these policies and the rise of a new society free from the exploitation of man.
